

# Favio Manrrubia

Full stack web developer

## ABOUT ME

Hello my name is Favio Manrrubia.

I am 33 years old, I am a student at the University of Buenos Aires, in the career systems degree.

Recently I studied at the soyhenry bootcamp as fullstack web developer, specializing in the Back-end side and in its safety.

I have participated in individual projects and groups, in which we have had a delivery date less than 30 days, achieving the objectives by far. My main objective is to acquire the largest possible level of knowledge, in order to be able to apply them to my ultimate goal, which is Informatic security.

Full Stack developer, backend oriented, with a clear focus on security and deliver clean and readable code.

### Group Project - HotelHunt

07/2023 - 08/2023

A group project carried out in a work team, where a reservation platform was created. In it you can see an intuitive and dynamic interface, as well as security systems in all aspects, safeguarding the integrity of end users and hotel administrators.

My tasks were to develop from the Database and the automated loading of initial data; including, but not limited to, its security and the interaction between the server and the UX.
